

humizen Fuze^{DS}

*Formerly known as **Activ80 DS**
64% humic acid (HPTA method)
3.04% fulvic acid (HPTA method)

Fuze DS is an organic, dry soluble humic acid powder. With 100% soluble humic acids, Fuze DS is an efficient way to produce small or large batches of humic acid liquid. When mixed with water, this highly compatible humic acid powder results in an organic solution that is compatible with many liquid fertilizers and micro nutrients.

Features

Fuze DS is ideal for producing small or large batch liquids, treating seeds and is suitable wherever extracted liquid Humic acids are used.

-  100% soluble
-  Highly concentrated humic (content)
-  Can be used directly in irrigation tanks or for manufacturing
-  Contains all the benefits of a liquid humic acid, without the bulk, making it convenient for shipping, storage and custom blending

Benefits

Predicts plant utilization and response more accurately.

Stimulates nutrient uptake and serves as a vehicle to carry vital nutrition to the plant.

Improves the efficiency in which plant utilize nutrients from the soil.

Testing Methods

All humiZen products use the "HPTA" testing method to report humic & fulvic acid content.

The HPTA method is the ONLY analysis method recognized by the HPTA, the J-AOAC, and ISO capable of accurately measuring fulvic acid.

Most suppliers of fulvic acid use outdated and inaccurate analysis methods in order to make higher fulvic claims. We hold the humiZen brand the highest standards and have chosen the highest standard of analysis.

 To learn more about humic testing methods, please see our website at www.blackearth.com

Application Rates

Crop	Application	Rate	Timing	Frequency
Vegetables, Fruit trees and established crops, Cereals	Soil application via irrigation systems or in drench	10 - 15 kg/ha 9 - 13 lb/ac	Divided it in applications of 1 - 3kg. Starting at planting	Bi-Weekly
Greenhouse vegetables, fruits etc.	Irrigation and hydroponic systems	2g/60L .05 oz/gal	Starting at planting	Bi-Weekly

Your Growth Partners

From agriculture to industrial application, our range of Canadian made products are built to help you achieve your growth goals. Backed by science, our sustainable humalite products improve soil health, create stronger plants and increase crop yields.

With humiZen you no longer have to choose between being a responsible environmental steward and your bottom line.
