

CONTAINS BENEFICIAL SUBSTANCE

Humic Acids derived from humalite

60%

PRODUCT INFORMATION

HumiZEN Fuze DS is an organic, dry soluble humic acid powder. With 100% soluble humic acids, humiZEN Fuze DS is an efficient way to produce small or large batches of humic acid liquid. When mixed with water, this highly compatible humic acid powder results in an organic solution that is compatible with many liquid fertilizers and micronutrients. Applications made according to directions for use may improve soil structure and aid in nutrient uptake and availability. Humic substances enhance soil chemical properties, including cation exchange capacity and micronutrient chelation, which may improve the availability and root uptake of essential micronutrients.

DIRECTIONS FOR USE

Read label in its entirety. Rate variations are a result of soil conditions. Soil tests should be completed first to apply the correct rate for agronomic conditions. HumiZEN Fuze DS should be added to water and agitated vigorously until fully dissolved. The ideal process is a closed circuit system like a Venturi pump. Always conduct a jar test to confirm compatibility prior to blending with any other product. Apply only as directed.

Refer to Technical Data Sheet (TDS) for specific blending/mixing capabilities for this product.

RECOMMENDED APPLICATIONS

VEGETABLES, FRUIT TREES AND ESTABLISHED CROPS, CEREALS

Soil application via irrigation systems or in drench: 9-13 lb./ac.
Divide into applications of 2-6 lb. starting at planting, apply bi-weekly.

GREENHOUSE VEGETABLES

Hydroponic systems: 1 oz./gal. starting at planting, apply bi-weekly.

LIQUID FORMULATIONS

Mix 1 lb./gal. of water to make a liquid concentration comparable to Liquid Carbon (7.65% HPTA method). Apply as directed for a liquid humic product. Please contact Black Earth for more information.
