BLACK EARTH

humiZEN™ Magna

CONTAINS BENEFICIAL SUBSTANCE

Humic Acids derived from humalite	50%

PRODUCT INFORMATION

HumiZEN™ Magna is a partially solubilized granule containing humic acids. It is suitable for broadcast, band, and in-furrow applications and is compatible with most dry fertilizers. Applications made according to directions for use may improve soil structure and aid in nutrient uptake and availability. Humic substances enhance soil chemical properties, including cation exchange capacity and micronutrient chelation, which may improve the availability and root uptake of essential micronutrients.

DIRECTIONS FOR USE

Read label in its entirety. Apply humiZEN™ Magna as a stand-alone product or blended with compatible dry fertilizers. Suitable applications include broadcast, pre-plant banding, and in-furrow applications. Environmental conditions may impact compatibility with certain fertilizers. Always conduct a jar test to confirm compatibility prior to blending with any other product. Do NOT solubilize for liquid application. Apply only as directed.

Refer to Technical Data Sheet (TDS) for specific blending/mixing capabilities for this product.

RECOMMENDED APPLICATIONS

CEREALS, OILSEEDS, PULSES, ANNUAL FRUIT & VEGETABLE, FORAGE CROPS, HEMP/CANNABIS

Broadcast applications: Apply humiZEN™ Magna pre-plant or pre-emergence on annual crops at rates of 20-75 lb./ac. as a stand-alone product or blended with compatible dry fertilizers. Apply humiZEN™ Magna prior to growing season or between cuttings on perennial forage crops at rates of 20-75 lb./ac. as a stand-alone product or blended with compatible dry fertilizers.

Band applications: Apply humiZEN™ Magna pre-plant or with fertilizers during planting at rates of 5-20 lb./ac. as a stand-alone product or blended with compatible fertilizers. Apply humiZEN™ Magna in-furrow at rates of 5-20 lb./ac.

TREE FRUITS & VINES

Broadcast applications: Apply humiZEN™ Magna prior to growing season at rates of 20-75 lb./ac., as a stand-alone application or blended with compatible dry fertilizers. Additional applications may be made as desired throughout the season. For best results, apply prior to fruit set.

TURF & ORNAMENTAL CROPS

Broadcast applications: Apply humiZEN™ Magna at any point during the growing season at rates of 2 lb./1,000 sq./ft., as a stand-alone application or blended with compatible dry fertilizers. Additional applications may be made as desired throughout the season.
