BLACK EARTH humaPLUS Liquid Carbon HC

CONTAINS BENEFICIAL SUBSTANCE

Humic Acids derived from humalite	24%

PRODUCT INFORMATION

HumaPLUS Liquid Carbon HC, derived from low rank coal humalite (weathered form of subbituminous coal), is a concentrated liquid humic substance extract. HumaPLUS Liquid Carbon HC can be easily diluted to desired level and is ideally used by in-furrow, top dressing, or injection through irrigation applications. Usage according to directions for use may improve soil structure and aid in nutrient uptake and availability. It is beneficial to balance the soil pH, enhance the moisture retention and increase cation exchange capacity of soil.

DIRECTIONS FOR USE

Read label in its entirety. Shake or agitate container prior to use. For best results, dilute with water to create a solution comparable to the concentration of humaPLUS Liquid Carbon. Always conduct a jar test to confirm compatibility prior to blending with any other product. Apply only as directed.

Refer to Technical Data Sheet (TDS) for specific blending/mixing capabilities for this product.
