BLACK EARTH

humaPLUS Liquid Carbon

CONTAINS BENEFICIAL SUBSTANCE

Humic Acids derived from humalite	12%

PRODUCT INFORMATION

HumaPLUS Liquid Carbon, derived from low rank coal humalite (weathered form of subbituminous coal), is a liquid humic substance extract. HumaPLUS Liquid Carbon can be easily diluted to desired level and is ideally used by in-furrow, top dressing, or injection through irrigation applications. Usage according to directions for use may improve soil structure and aid in nutrient uptake and availability. It is beneficial to balance the soil pH, enhance the moisture retention and increase cation exchange capacity of soil.

DIRECTIONS FOR USE

Read label in its entirety. Shake or agitate container prior to use. Apply humaPLUS Liquid Carbon as straight product or blended with compatible fertilizers. Diluting humaPLUS Liquid Carbon at a ratio of 1:1 with water before mixing typically improves compatibility. Always conduct a jar test to confirm compatibility prior to blending with any other product. Apply only as directed.

Refer to Technical Data Sheet (TDS) for specific blending/mixing capabilities for this product.
